

FOR IMMEDIATE RELEASE

Voyager Expanded Learning's Vmath Taking Quantile Measures National

Leading Intervention Provider and MetaMetrics Extend Partnership to Allow Educators Across the Country to Align Mathematics Instruction With The Quantile Framework for Mathematics

San Antonio, Texas, Lexile National Conference & Quantile Symposium – June 18, 2008 – MetaMetrics® Inc. and Voyager Expanded Learning® announced today that the national edition of Voyager's Vmath® intervention program will be integrated with The Quantile Framework® for Mathematics.

"Vmath with Quantile measures has been so successful in Texas that it is only natural to roll out the program nationally," said Ron Klausner, president, Voyager Expanded Learning. "Now educators nationwide will be able to use Quantile measures to assess students' needs and track their progress to help them achieve state standards."

Vmath accelerates the mathematics achievement of struggling students by building on and reinforcing key concepts, skills and strategies of each state's mathematics standards. Beginning in the 2008-2009 school year, teachers who use Vmath Levels G, H and I will be able to link the Vmath teacher-led instruction and computer-assisted practice with informative progress assessments powered by the Quantile Framework. Teachers will use the assessment results to analyze students' mathematics achievement and differentiate Vmath instruction to meet their learning needs.

The Quantile Framework uses a common, developmental scale to measure student mathematics achievement, the difficulty of mathematical skills and concepts, and the materials for teaching mathematics. By placing the teaching materials and student achievement on the same scale, Quantile measures enable teachers to describe which mathematical skills and concepts a student is ready to learn and those that require

additional instruction. Then, students can be matched with the resources that meet their learning needs.

“We are excited about expanding our collaboration with Voyager Expanded Learning,” said MetaMetrics President Malbert Smith III, Ph.D. “Voyager’s Vmath intervention program already has helped countless students in Texas improve their mathematics abilities. With the integration of Quantile measures into Vmath’s national edition, it’s gratifying to consider how many more educators will have access to these powerful tools for differentiating mathematics instruction and ensuring all students are on track for meeting state standards.”

About MetaMetrics Inc.

MetaMetrics Inc., a privately held educational measurement company, develops scientifically based measures of student achievement that link assessment with instruction, foster better educational practices, and improve learning by matching students with materials that meet and challenge their abilities. The company’s team of psychometricians developed the widely adopted Lexile Framework® for Reading (www.Lexile.com); El Sistema Lexile® para Leer, the Spanish-language version of the Lexile Framework; The Quantile Framework for Mathematics (www.Quantiles.com); and The Lexile Framework for Writing. In addition to licensing Lexile and Quantile measures to state departments of education, testing and instructional companies, and publishers, MetaMetrics delivers professional development, resource measurement and customized consulting services. For more information, visit www.MetaMetricsInc.com.

About Voyager Expanded Learning

Voyager Expanded Learning is a gold-level sponsor of the 2008 Lexile National Conference & Quantile Symposium. The company provides core, intervention and supplemental reading programs, as well as math intervention and ongoing professional development programs for school districts throughout the United States. Founded in 1994, Voyager has delivered extended-time reading and basic skills intervention programs, as well as large-scale reading and math programs, to more than 1000 school districts in cities such as Buffalo, Miami, New York City, Richmond, Va., Oklahoma City, El Paso and Los Angeles, resulting in dramatically improved student performance. Voyager Expanded Learning, Inc.

is a business unit of Voyager Learning Company (OTC: VLCY.PK) and based in Dallas, Texas. For more information, please visit www.voyagerlearning.com or call 1-888-399-1995.
